About me

As an application developer, I currently hold the role of Full Stack Developer. I am characterized by being self-sufficient in learning, always willing to ask questions to improve my skills. I have the ability to work effectively in teams and possess a strong initiative in my work. I am committed to my professional and personal development and always seek opportunities to grow.

Inglés · high

Interests

I have a broad interest in the technological field, ranging from network architectures and servers to both front-end and back-end programming, as well as cybersecurity and artificial intelligence. Currently, I am expanding my knowledge in cybersecurity with the aim of obtaining the OSCP certification.
